## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-8, 9-15 and 16-23 are directed to respectively method, system and a product for identifying latent demand for at least one of a plurality of commodities which recite a feature of analyzing at least a plurality of initially unaccepted offers for each of the plurality of commodities and one of the plurality of commodities is selected to offer for sale based on this analysis and at least one criteria that identifies a latent demand in the selected commodity.

II. Claims 24-30 and 31-36 are directed to respectively method, system for selling a commodity which include a feature of analyzing a plurality of offers for a plurality of commodities in auction using a determined criteria, selecting at least one of a plurality of commodities based on the analysis that identifies a latent demand in the selected commodities and offering to sell the selected commodity for a price based on an average offer for the commodity.

Species A: claims 24-25, 26, 31, 32-33 (dividing average offers to obtain an analyzed value)

Species B: claims 24, 27-30, 31-35, 36, 34 (combination of two or more items, sources of the offers etc.)

2. The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown

Art Unit: 3624

to be separately usable. In the instant case, invention I has separate utility such as determining latent demand for a plurality of commodities based upon analysis of a plurality of initially unaccepted offers for each of the commodities whereas invention II has a utility such as analyzing a plurality of offers for a plurality of commodities in an auction and offering to one or more of the commodities for a price based on the analysis. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

Invention I contains:

Species A: claims 1-2-3, 6, 7-8 (dividing average offers to obtain an analyzed value) and

Species B : claims 1-4-5, 6,7-8 (selecting price based on average of offers)

Art Unit: 3624

Invention II contains:

Species A: claims 24-25, 26, 31, 32-33 (dividing average offers to obtain an analyzed value)

Species B: claims 24, 27-30, 31-35, 36, 34 (combination of two or more items, sources of the offers etc.)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, independent claims 1, 9 and 16 for invention I and independent claims 24, 31, 32 and 34 are considered as generic claims for invention II .

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37

Art Unit: 3624

CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Joseph A Parisi (Reg. 53,435) on 4/14/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

#### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
